

Conditional Access Module

For Digital TV, Premium and Pay-Per-View Services

**OFFICIALLY LICENSED
AND CERTIFIED**

SCM Microsystems' Conditional Access Module (CAM) enables digital set-top boxes and integrated digital televisions to receive current premium and pay-per-view TV channels.

Adopted by the majority of Conditional Access vendors, SCM modules provide an interchangeable solution for accessing all major digital broadcast offerings.

Compliant with the DVB Common Interface, OpenCable™ and NRSS-B standard, SCM's family of Conditional Access Modules allows consumers to choose their digital TV receiver independent of the digital TV service.
